SUMMARY

Recent Master of IT (Business Analytics) graduate with internship experience at PwC. Experienced in translating stakeholder needs into functional specs, creating Power BI dashboards, and automating reporting tasks. Strong foundation in data cleaning, ETL, and Agile collaboration; ready to contribute to a team as a Business Analyst.

SKILLS

- **Business Analysis:** Requirement elicitation, stakeholder management, process mapping, user stories, As-Is / To-Be
- **Data & BI:** Power BI, DAX, SQL, ETL (staging, transformation), Star Schema, Data Validation
- **Analytics & Scripting:** Excel (advanced: pivot, Power Query), Python, R,
- **Tools:** Jira, Visio, Lucidchart, SharePoint, PowerApps, Power Automate, Azure, Fabric
- **Soft Skills:** Agile (Scrum), Documentation (BRD, FRD), Risk & issue logs

WORK EXPERIENCE

PwC, Ho Chi Minh City

01/2026 – 04/2026

Tax Technology Internship

- Delivered a **3-page Power BI report** used by directors and partners across **800+ client sites**, enabling identification of underperforming areas and prioritisation of remediation actions
- Analysed and redesigned the deletion request workflow, implementing real-time tracking and automated status updates, significantly **reducing manual follow-ups** and enabling **instant request visibility**.
- **Wrote functional specifications** for a secure TaxLookup solution with role-based access and validation rules, reducing access errors and supporting compliance
- Facilitated stakeholder workshops, captured user stories and acceptance criteria, and coordinated UAT to ensure solution adoption

KOSEC, North Sydney

01/2025 – 05/2025

Research Analyst Internship

- Gathered and analysed business requirements from stakeholders to guide the reporting of market trends and investment opportunities.
- Delivered daily, weekly, and monthly market reports by consolidating financial data and news sources, enabling stakeholders to identify investment opportunities and respond to market trends in a timely manner.

Chemist Warehouse, Hamilton

12/2024 – 01/2026

Pharmacy Assistant

- Applied store analytics to optimise product placement and supported promotional campaigns; tracked customer engagement to evaluate campaign effectiveness
- Supported promotional campaigns with setup, monitoring, and customer engagement tracking.
- Built strong interpersonal skills through daily customer interactions and teamwork in a fast-paced retail environment.

PROJECTS

Pedestrian Patterns on Major Sydney Street [Link](#)

05/2025

- Analysed Automatic Hourly Pedestrian Count data from the **City of Sydney Data Hub**
- **Designed and implemented an ETL staging process** to clean hourly pedestrian counts (null handling, deduplication, datetime standardisation), producing an auditable data pipeline used for reporting and analysis.
- Developed a Power BI dashboard with dynamic **KPIs** and interactive drill-downs

Skill: Power BI · SQL · Excel · Data Modelling · DAX · ETL Pipeline

Myall River Monitoring

08/2024 - 10/2024

- Conducted stakeholder analysis, including identification, power/interest mapping, and management strategies to ensure alignment with community, government, and environmental organisations.
- **Mapped As-Is** and designed **To-Be processes** for water sampling and reporting using activity and use-case diagrams, identifying 3 process bottlenecks and specifying requirements to remove manual handoffs.
- Performed **PESTLE** and **SWOT** analyses to evaluate external factors, risks, and opportunities affecting implementation feasibility.

- Defined requirements, objectives, and constraints for current processes such as water sampling, reporting, and stakeholder communication.

Skill: Process Mapping · SWOT & PESTLE · Lucidchart · Requirements Documentation

Online Fire Management System05/2024 – 06/2024

- **Led requirements elicitation and produced BRD/FRD artifacts** including use cases, user stories, and acceptance criteria to align developers and stakeholders on scope and priorities.
- **Created UML diagrams and user flows** to validate system behaviour and reduce development rework, coordinated sprint planning and backlog grooming in Jira.
- Collaborated in an Agile environment to design and refine system prototypes based on iterative stakeholder feedback, improving solution alignment with user requirements.

Skill: UML Diagrams · Microsoft Project · Visio · Bubble · Jira · Stakeholder Communication · MS Team

EDUCATION

University of Newcastle08/2023 - 08/2025

Master of Information Technology | Major: Business Analytics

Relevant Coursework: Data Analytics for Business, Business Intelligence for the Enterprise, Object Oriented Programming, System Analysis and Design, Process Analysis and Problem Solving, Project Planning and Management

S P Jain School of Global Management10/2020 - 05/2023

Bachelor of Data Science

Relevant Coursework: Advanced Analytics, Statistical Data Analysis, Programming for Analytics
